

**CODE 201**

# **Foundations of Software Development**

Day 1: Academic Overview

A dark, grayscale background image showing a group of students in a classroom or study hall. Some students are sitting at tables with laptops, while others are standing and talking. The image is dimly lit, with the text overlaid in the center.

**Curriculum**  
**Grading**  
**Canvas**  
**Learning Methodologies**  
**Advice From Instructors**  
**Review of the Prework**

A dark, grayscale photograph of a classroom or study hall. Several students are visible, some sitting at desks with laptops, others standing and talking. The image is dimly lit, with the text overlaid in the center.

# Curriculum

Code 201

# 201 MINDMAP

You'll be spending a lot of time with this content!

# 301 MINDMAP

Here's what's ahead in the next course!

---

## Weekly Class Structure

Here's what to expect!

- A project that extends over the week
- One or two days of pair/group work in lab
- Two or three quizzes per week
- A trajectory where Mon-Wed see the introduction of a lot of new material
- Thur-Fri tend to be focused on refinement

---

# Weekly and Daily Class Structures

Here's what to expect!

## Weekly

- A project that extends over the week
- One or two days of pair/group work in lab
- Two or three quizzes per week
- A trajectory where Mon-Wed see the introduction of a lot of new material
- Thur-Fri tend to be focused on refinement

## Daily

- Code review in class on most days
- Reading assignments to submit
- Code assignment to submit
- New concepts from readings
- Code demos in class: do your best to keep up, but sometimes just watch

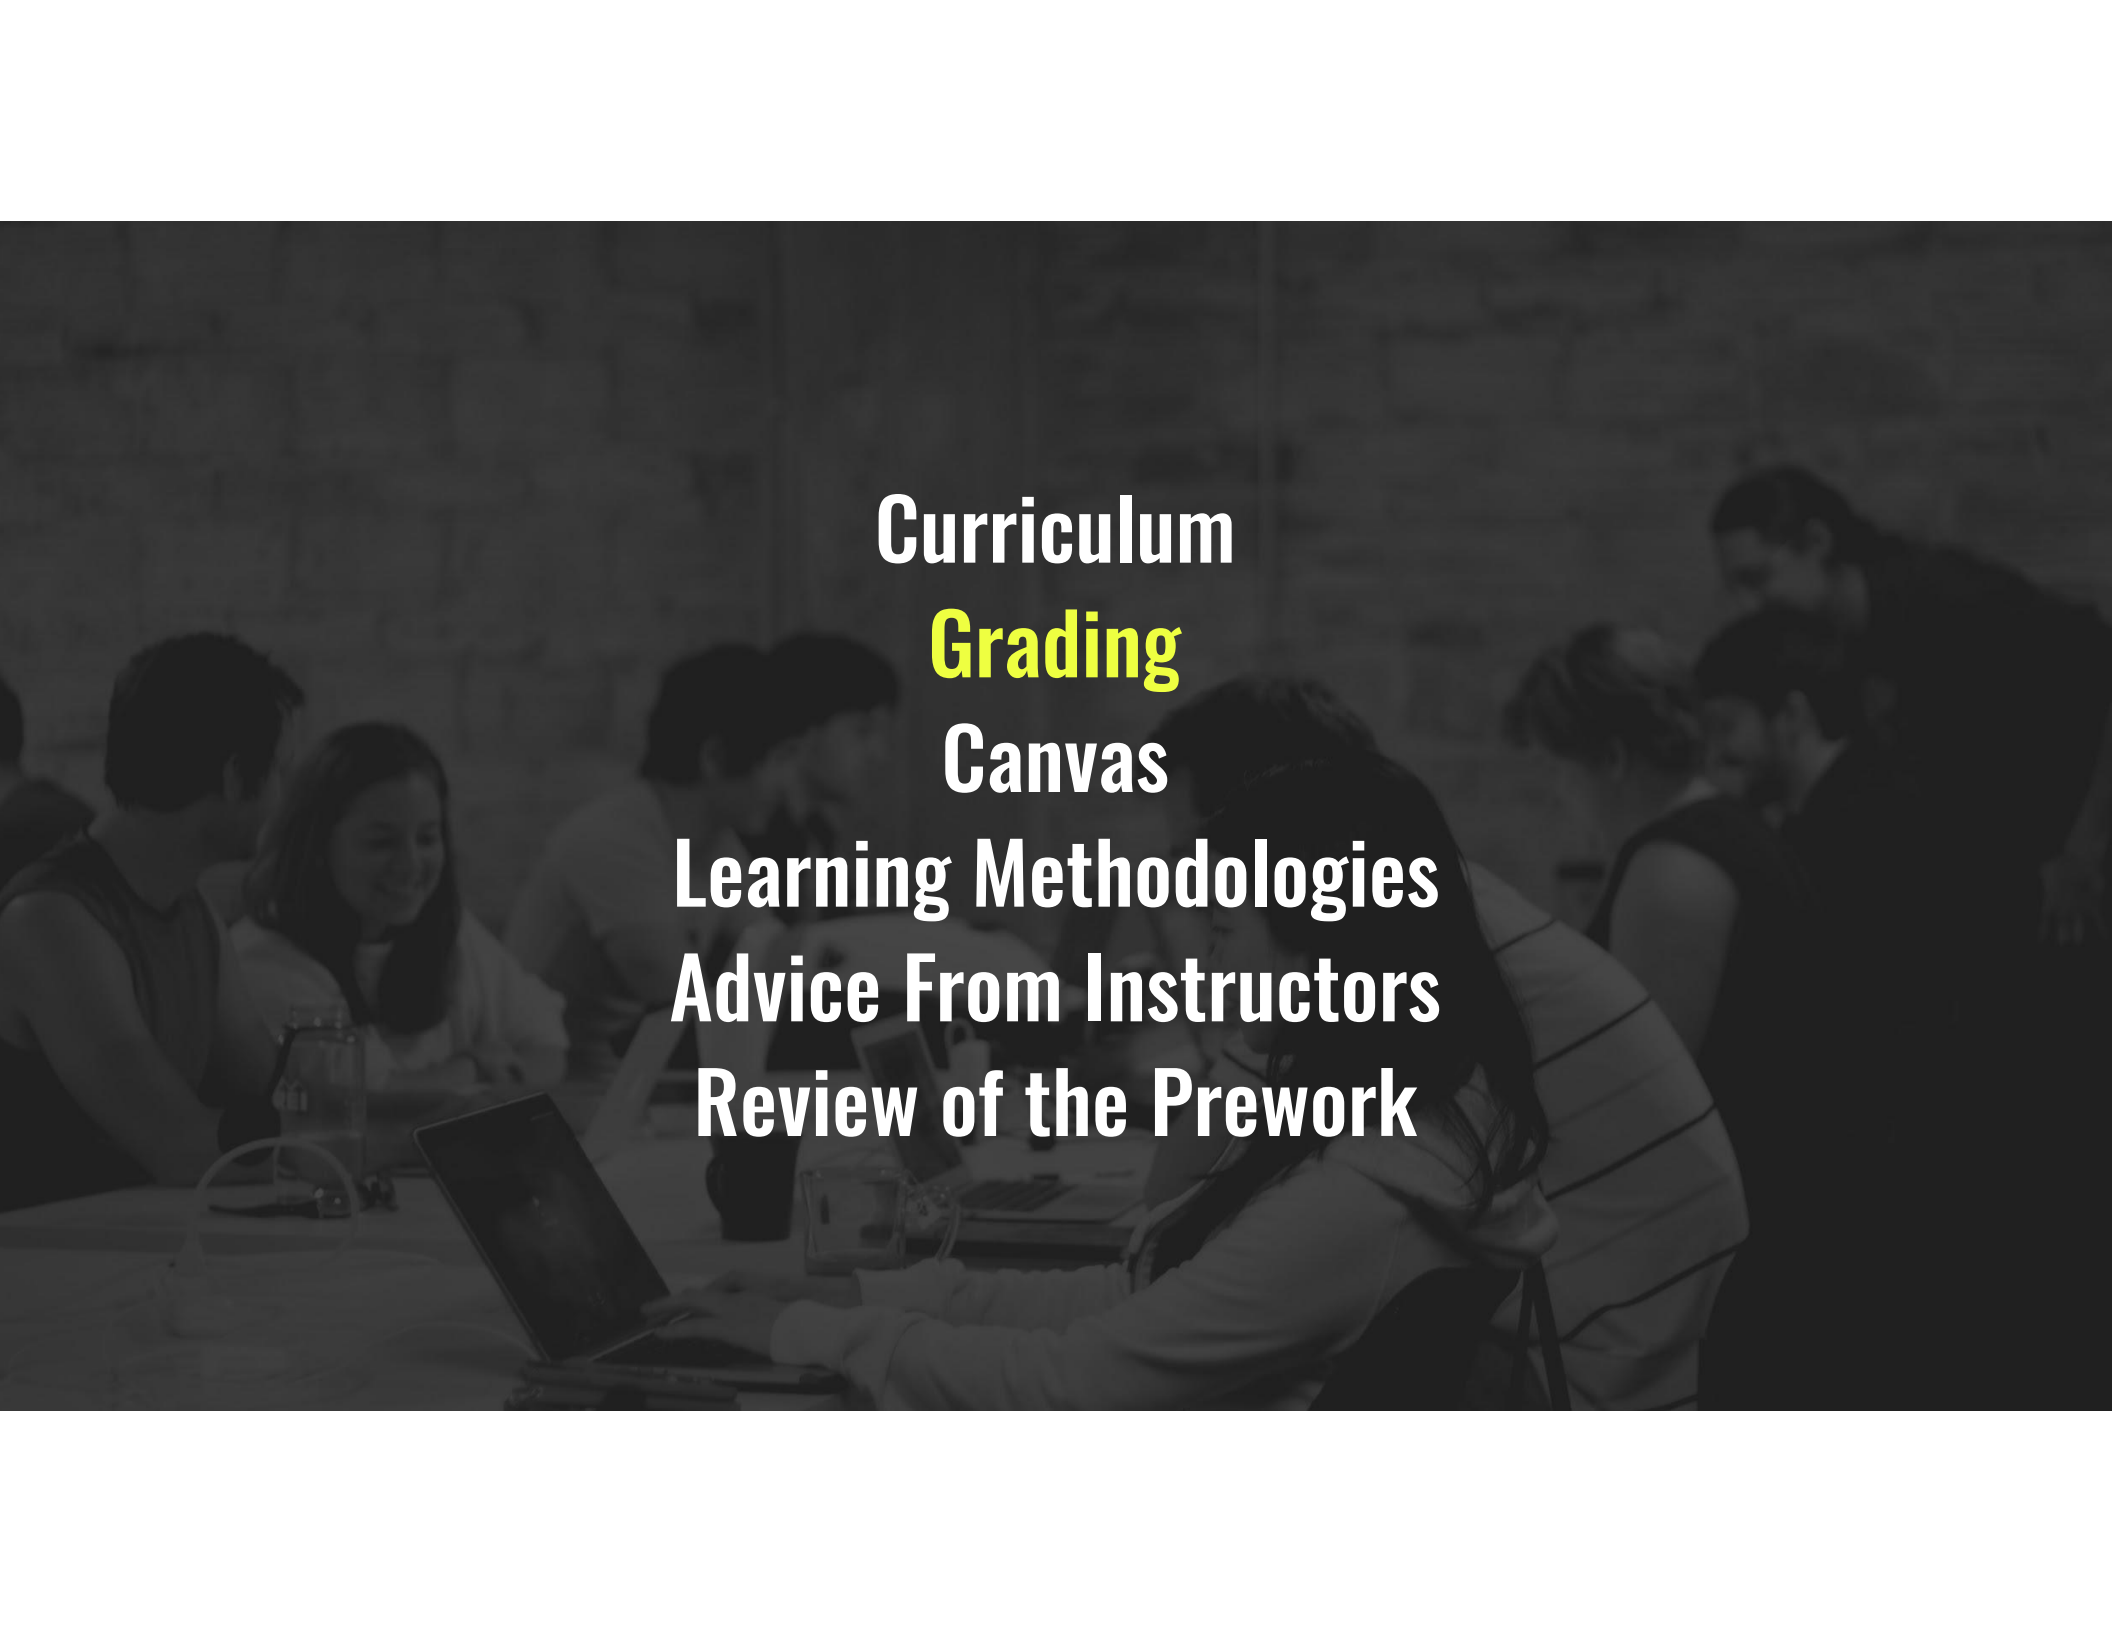

---

15.

Fifteen. We mean it. Fifteen.

A dark, grayscale background image showing a group of students in a classroom or study hall. Some students are sitting at tables, looking at laptops or papers, while others are standing and talking. The image is dimly lit, with the text overlaid in the center.

**Curriculum**  
**Grading**  
**Canvas**  
**Learning Methodologies**  
**Advice From Instructors**  
**Review of the Prework**

A dark, grayscale photograph of a classroom or study hall. Several students are visible, some sitting at desks with laptops, others standing and talking. The image is dimly lit, with the text overlaid in the center.

# Grading

Code 201

---

# GRADING WEIGHTS

How much each part of the class counts

- 10% Attendance
- 5% Prework
- 10% Readings/Discussions
- 10% Quizzes
- 30% Daily Code Assignments
- 30% Final Projects
- 5% Participation in Weekly Course Surveys

---

# GRADING OF CODE ASSIGNMENTS

## How your code is evaluated

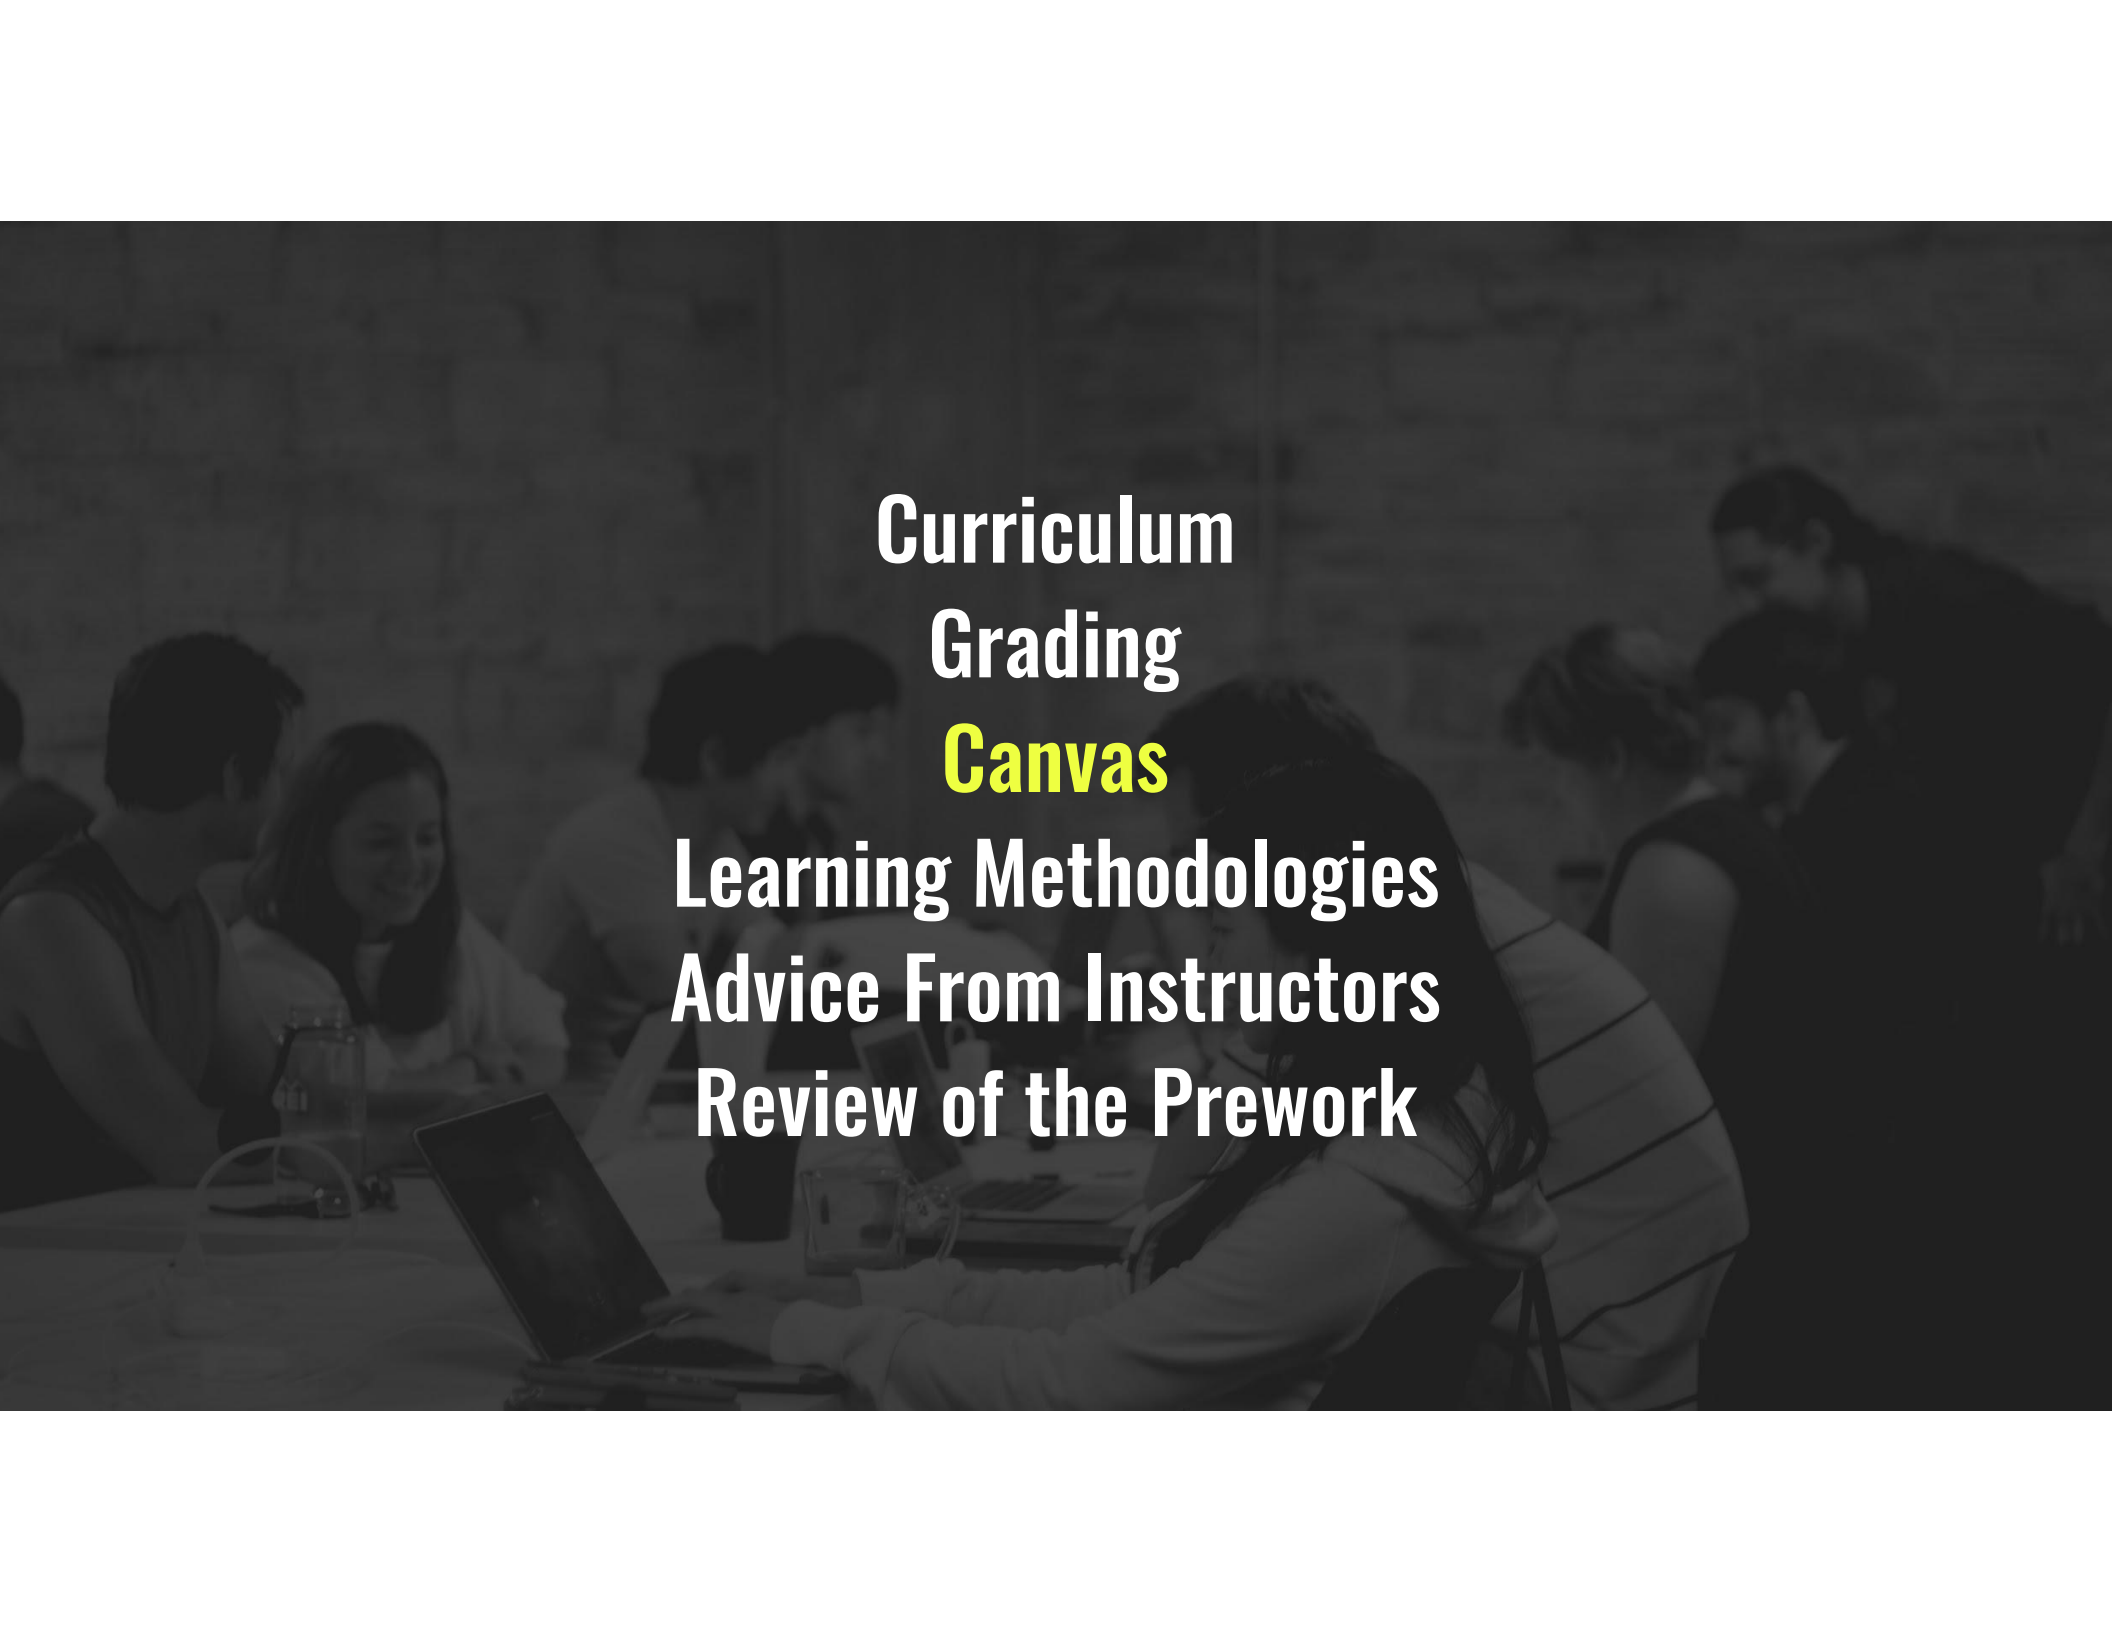

### Assignment Rubric

Points are granted to each assignment based on how the submission meets the following criteria:

	Met all assignment requirements	Idiomatic style used	Proper Git workflow utilized	Other adjustments	Total possible
	6 points	3 points	1 point		
Submission					10 points
Late submission				-2 points	8 points

### Policy on late work

- Assignments that are missing or substantially incomplete at the submission deadline will be graded as 0 points.
- After the submission deadline, assignments can be resubmitted:
  - Any assignment earning at least 2 points can be resubmitted for a regrading with no penalty.
  - Any assignment with 0 or 1 points can be resubmitted for regrading, incurring a 2-point penalty.
- Submissions for re-grading are allowed at any time, up until 1 week after the last day of class.
- After that, any incomplete work should still be submitted (although it won't be graded) before starting the next Code Fellows class in the sequence.

A dark, grayscale background image showing a group of students in a classroom or study hall. Some students are sitting at tables with laptops, while others are standing and talking. The image is dimly lit, with the text overlaid in the center.

# Learning Methodologies

Code 201

# LEARN TO LEARN

The gift that keeps on giving.

---

# HOW YOU LEARN MATTERS

It matters A LOT, actually.

## Learning Pyramid

Source: National Training Laboratories, Bethel, Maine

---

# ANDRAGOGY

Adult learning is different. Very different.

...or What? So What? Now What?

---

# PATHS VS. SANDBOXES

Paths get you to the sandboxes...

## PATHS

SHAPE BEHAVIOR

ARE GAMES TO BE PLAYED

LEAD PEOPLE ALONG

HAVE PREDICTABLE OUTCOMES

ARE MEASURABLE

DESIGN EVERY DETAIL

ARE CONSUMPTIVE

CREATE DEPENDENCY

HAVE A CLEARLY DEFINED PURPOSE

LEAD TO COMPLETION

END IN AN EXCHANGE

## SANDBOXES

CREATE ENGAGEMENT

ARE SPACES IN WHICH TO PLAY

LET PEOPLE EXPLORE

HAVE UNKNOWN OUTCOMES

ARE OBSERVABLE

UNDERSPECIFY THE DESIGN

ARE GENERATIVE

ENCOURAGE AUTONOMY

PURPOSE IS SELF-DETERMINED

LEAD TO UNDERSTANDING

END IN LEARNING & DISCOVERY

CODE FELLOWS

---

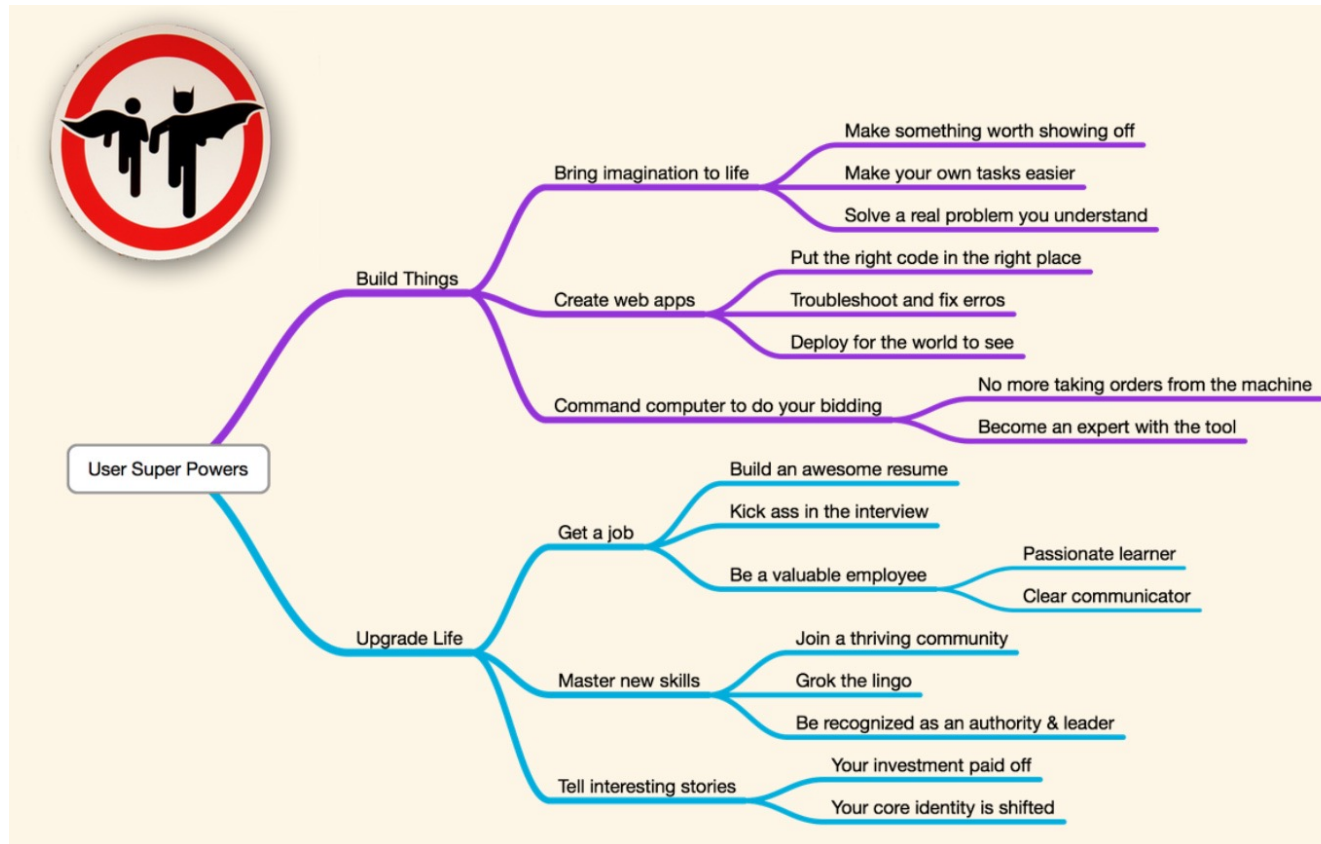

# QUIZZES AND WHITEBOARDING

How we'll use them

- Nowhere to hide...
- They're as much about confidence as evaluation
- Whiteboarding is a common part of technical interviews
- Quizzes have unlimited retries
- Only quizzes are graded; whiteboard practice is not
- Whiteboarding practice is closed-lid/book
- Whiteboarding practice lets us see exactly where you are so that we can dial in our instruction on your needs

# SUPER POWERS

Really.

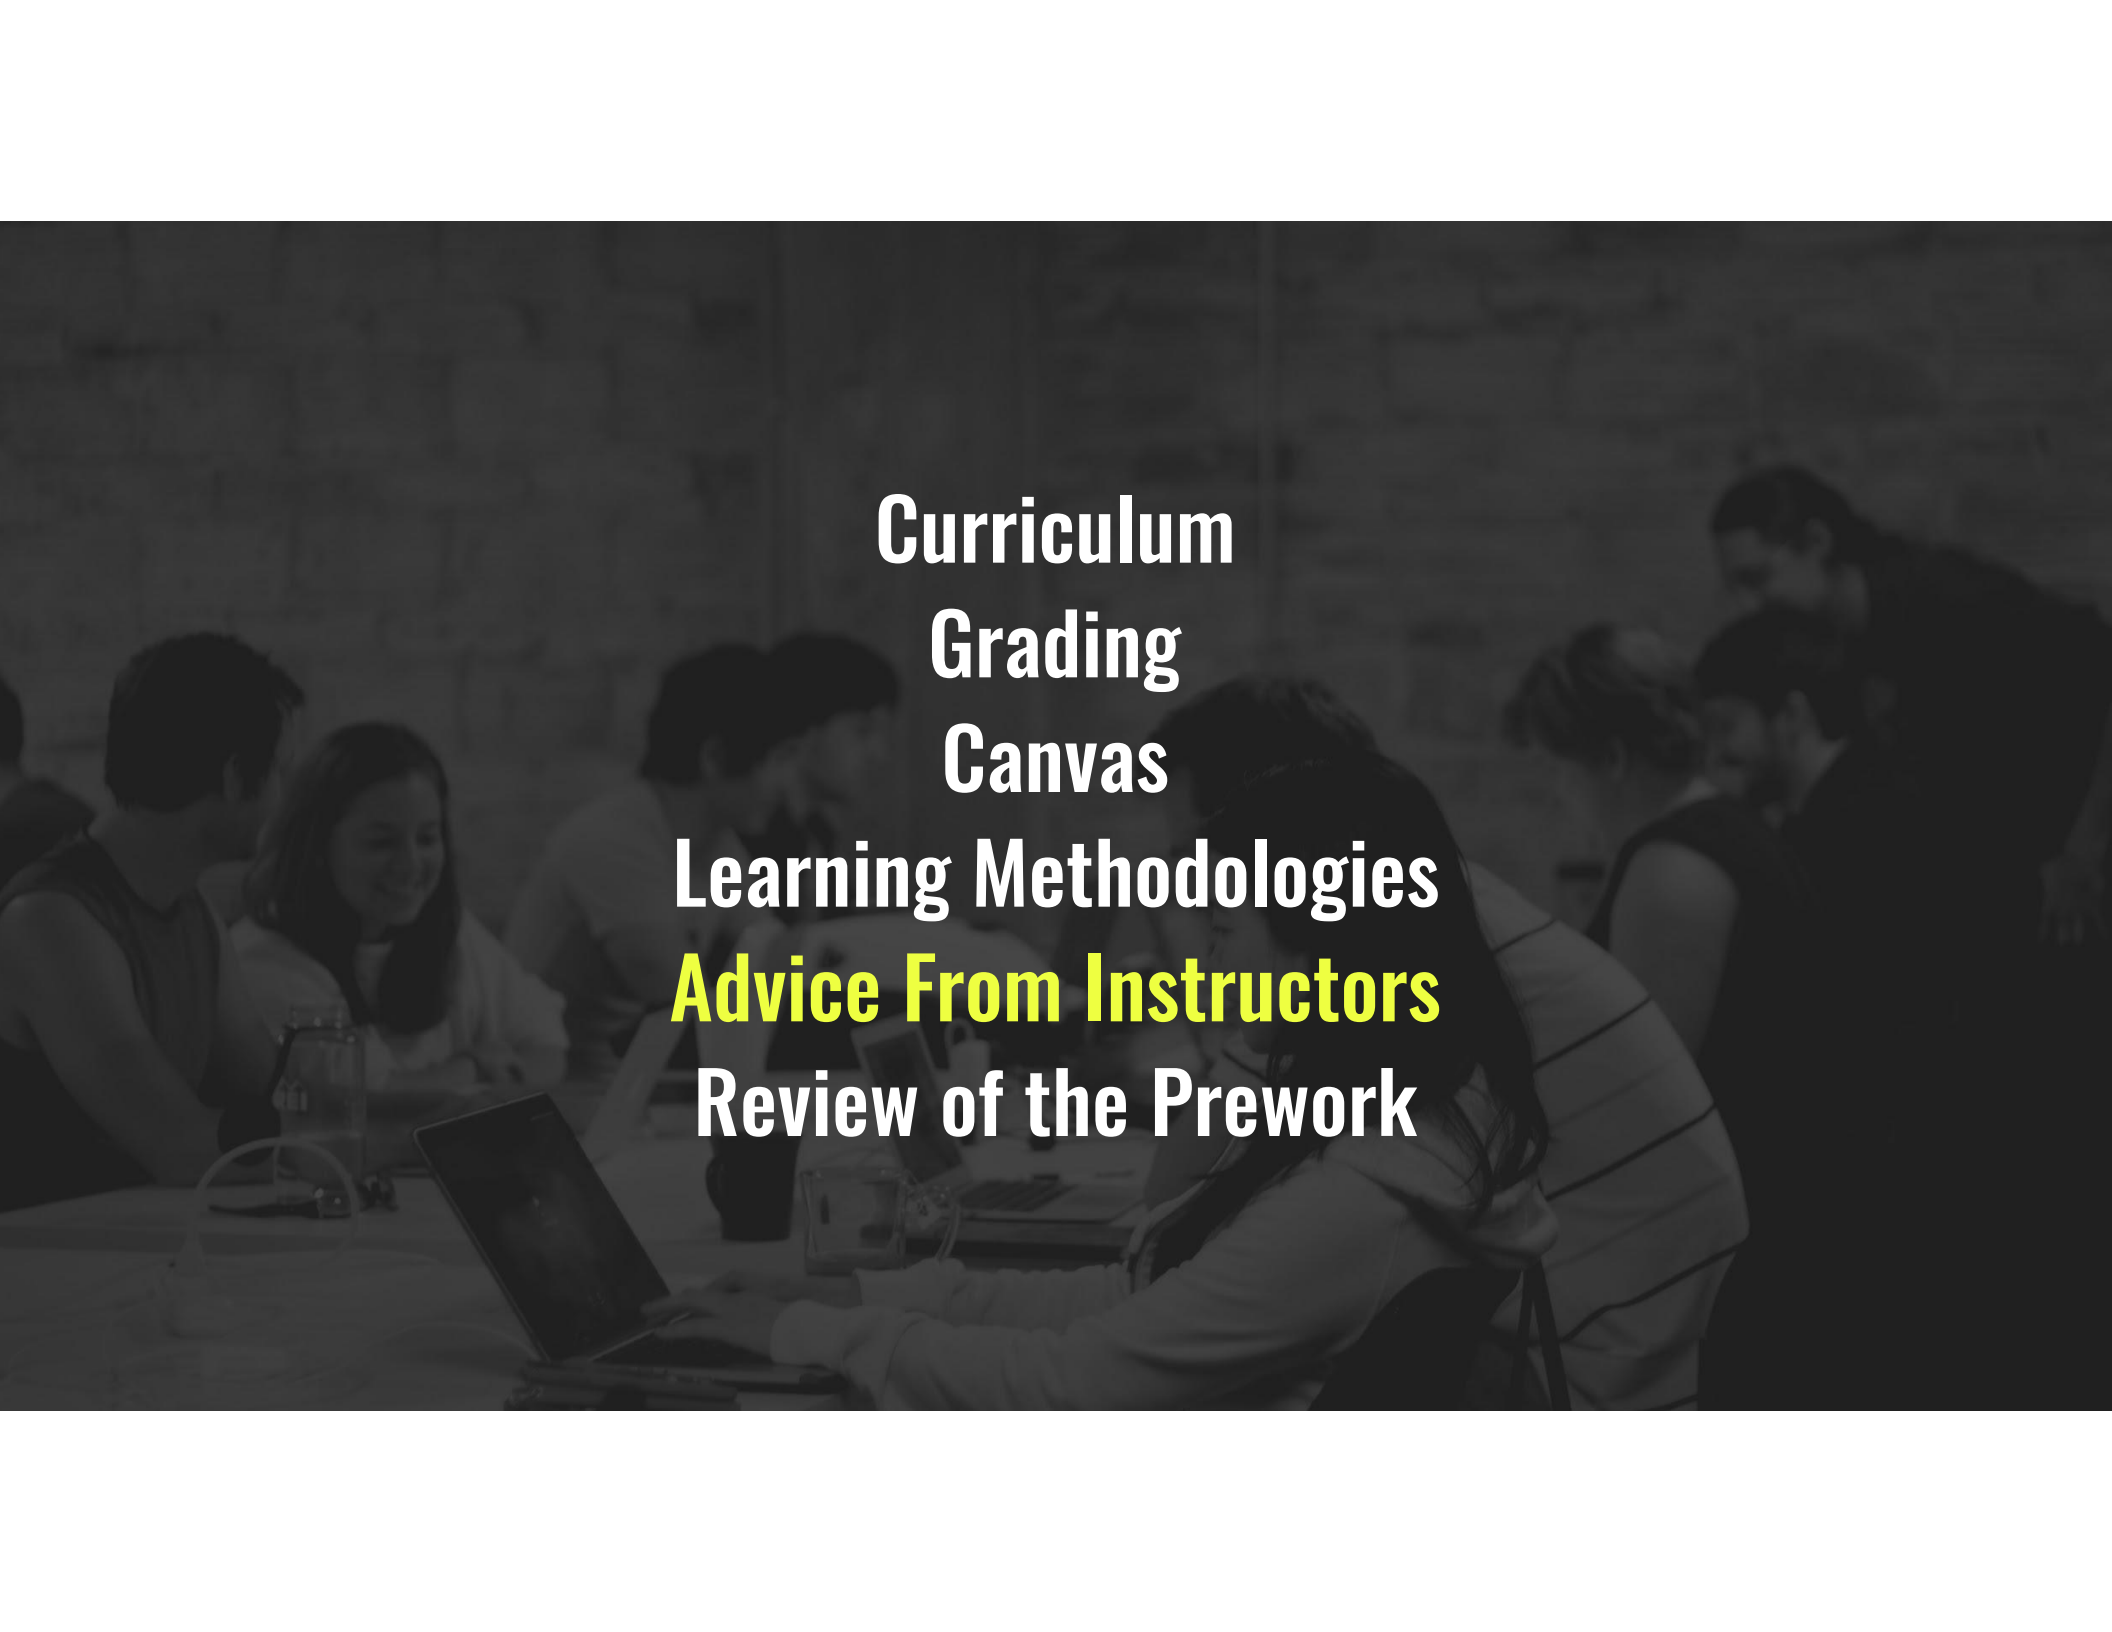

---

## BE CONFIDENT

This is going to be very challenging. Be ready. Be confident. You can.

A dark, grayscale background image showing a group of students in a classroom or study hall. Some students are sitting at tables with laptops, while others are standing and talking. The image is dimly lit, with the text overlaid in the center.

Curriculum  
Grading  
Canvas  
Learning Methodologies  
**Advice From Instructors**  
Review of the Prework

A dark, grayscale photograph of a classroom or computer lab. Several students are seated at long tables, working on laptops. The lighting is dim, and the overall tone is professional and academic. The text is overlaid on the center of the image.

# Advice from Instructors

Code 201

# INSTRUCTORS SAY...

(...and they know what they are talking about...)

**Brook** says: "Never copy/paste code. If you want to use someone else's snippet, at the very least, RETYPE it, so you can learn it, and think about how it fits in with your existing code."

# INSTRUCTORS SAY...

(...and they know what they are talking about...)

**Paul** says: "I tell all my students they are allowed to learn and look at source code from everywhere, they are just not allowed to copy and paste it directly. Even better is to read it first, explain it verbally, and then translate that explanation into their own source code, so they can even improve upon it or add their own style."

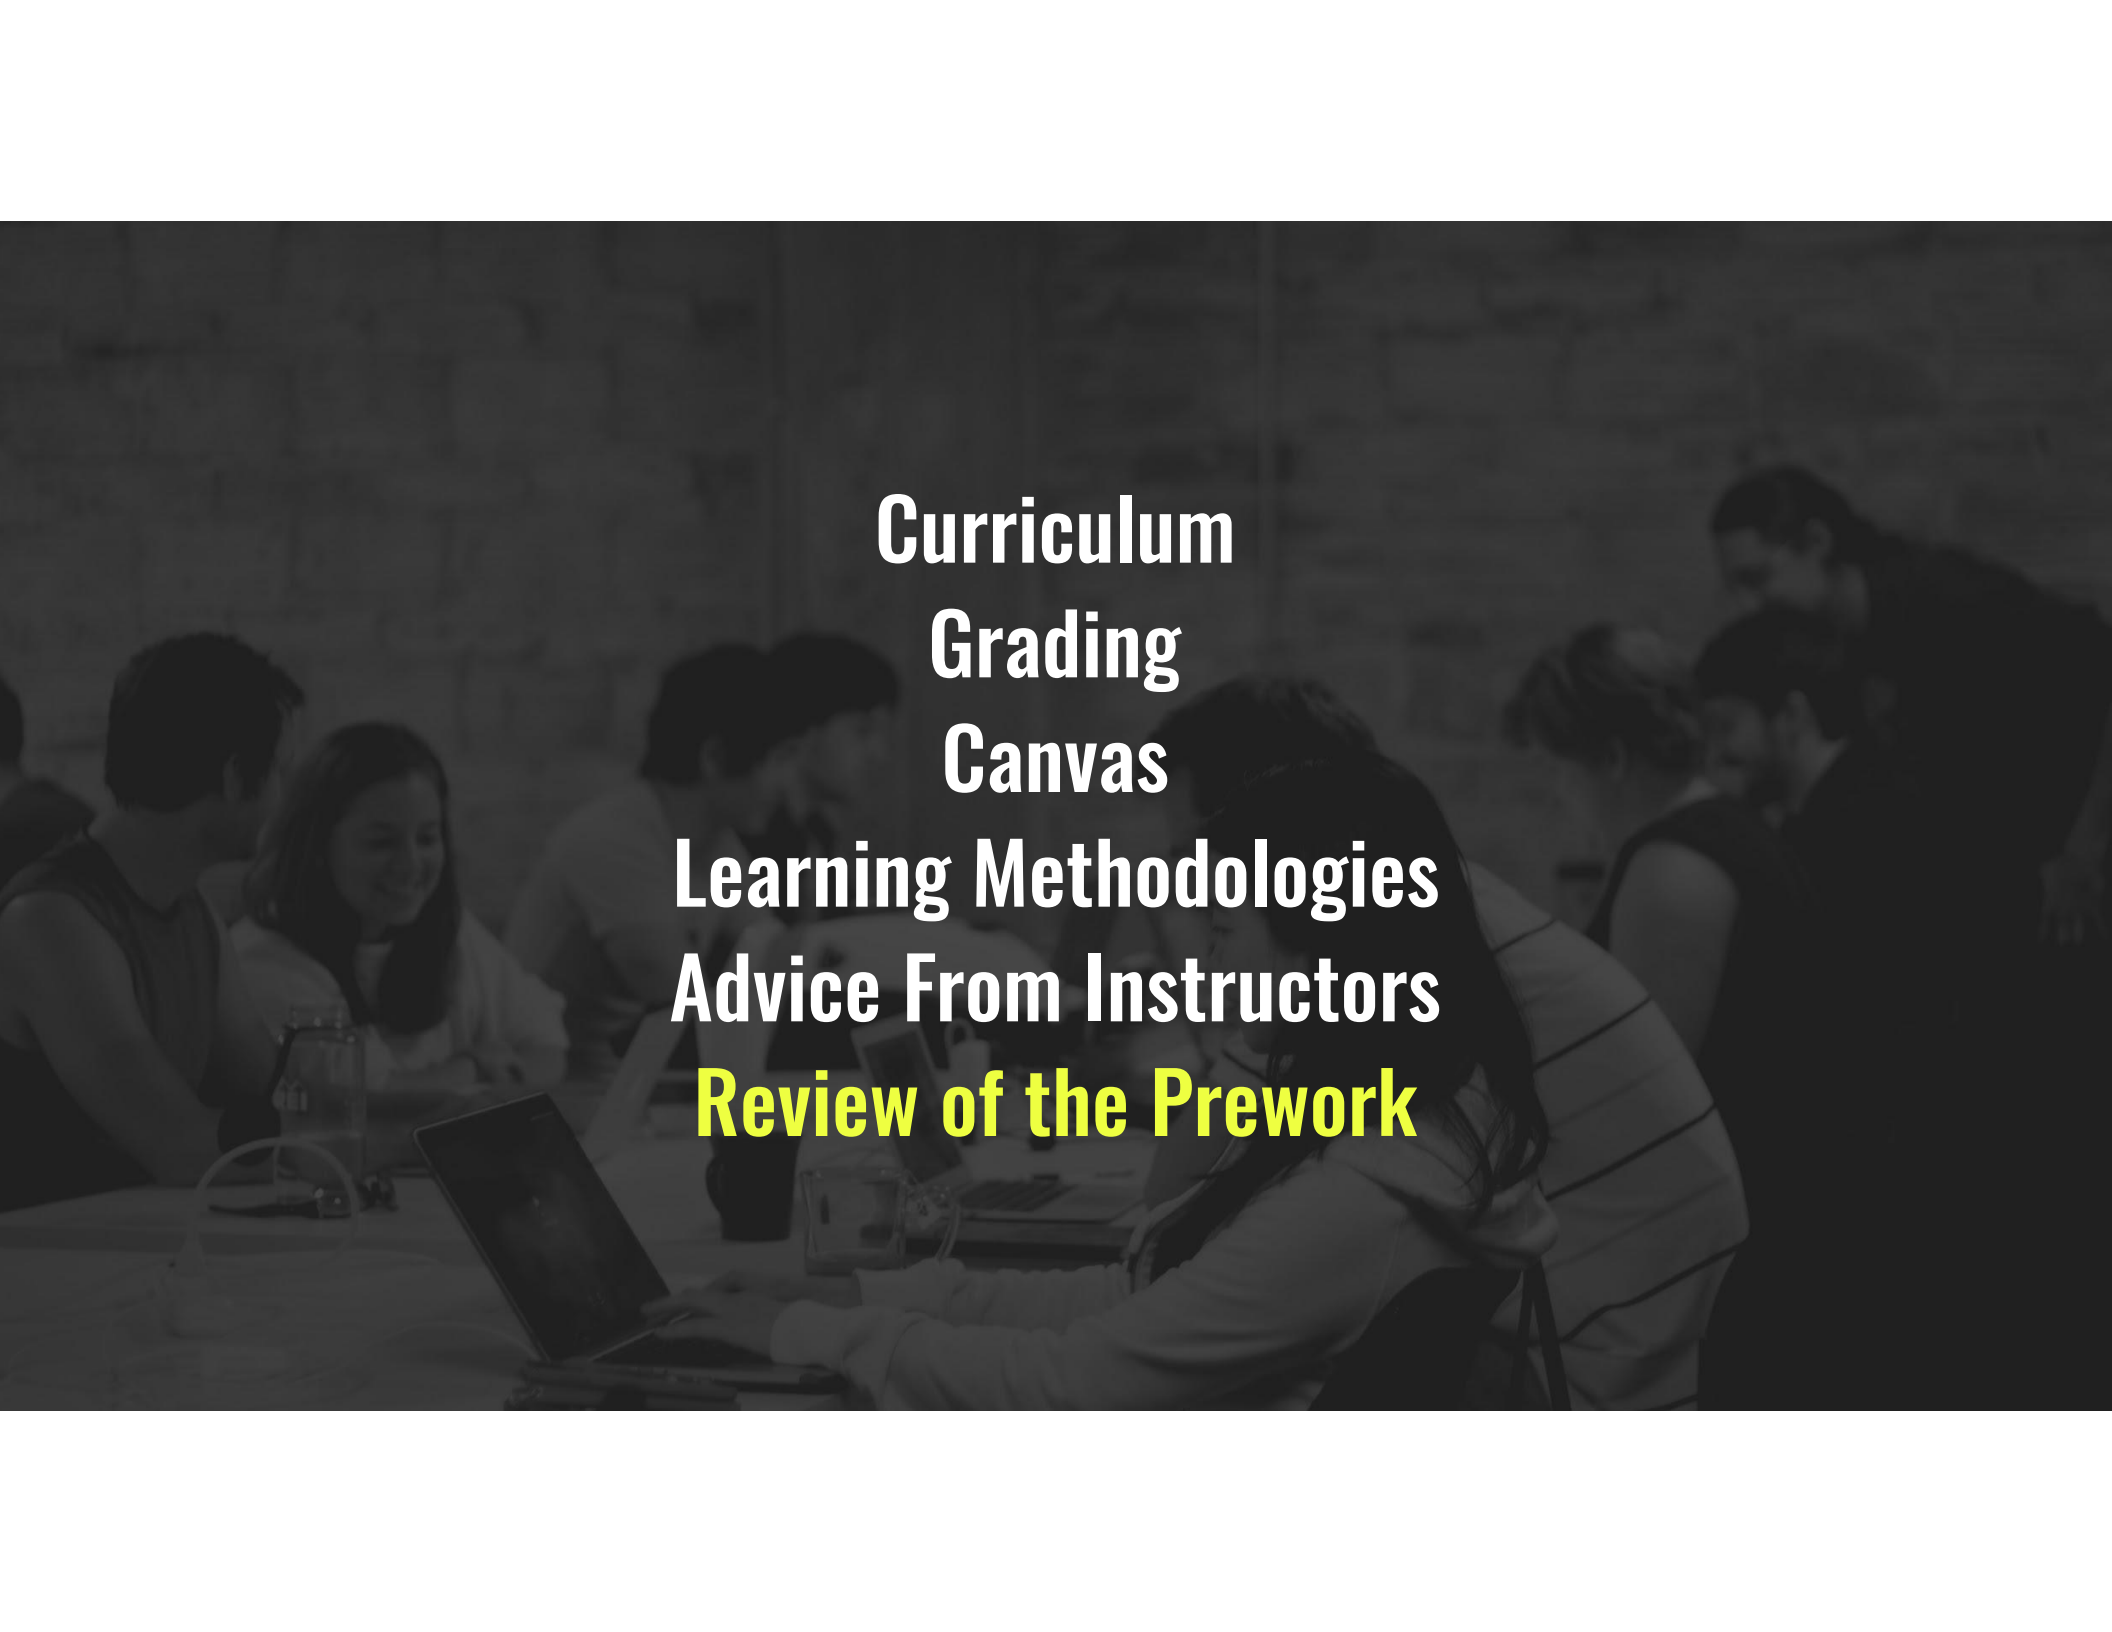

# INSTRUCTORS SAY...

(...and they know what they are talking about...)

**Sam** says: "Talk to the duck."

A dark, grayscale background image showing a group of students in a classroom or study hall. Some students are sitting at tables, looking at laptops or papers, while others are standing and talking. The image is dimly lit, with the text overlaid in the center.

Review of the Prework**

# Review of the Prework

Code 201

---

## REVIEW OF THE PREWORK

How did it go? What kind of questions do you have?

- Just curious: Who took Code 101?
- In general, how did your laptop setup go? In the next portion of class, after this review, we'll be extending your setups
- Everyone is on Slack? (Let's see some Slack tricks!)
- Everyone has textbooks?
- Brush-up on algebra... why, you wonder?
- Terminal: We're doing a lot more with it later today
- Git and version control... you're going to see a lot of it!
- Codecademy tutorials... how did they go? Questions?
